

Data-Driven Landfill Solutions: Sanborn Head Partners with ddms

DECEMBER 10, 2024

Sanborn Head is excited to announce the launch of Project Portal® as its new landfill data management system.

Project Portal® is built and hosted by [de maximis Data Management Solutions \(ddms\)](#) and through collaboration with Sanborn Head, has been optimized for use in managing mission critical landfill information. This partnership underscores Sanborn Head's unwavering commitment to innovative landfill management systems. With the launch of [Project Portal®](#), Sanborn Head and ddms are setting a new standard in landfill gas and leachate data management services.

Project Portal® is a robust, cloud-based environmental data management system that has been meticulously designed to cater to the unique needs of landfill operators, providing them with an integrated framework to make informed decisions based on precise environmental data. The web-based system offers an exceptional advantage by streamlining and synthesizing various on-site landfill devices, including flow meters, flares, pump stations, and systems for wastewater, leachate treatment, and power plants. The real-time access to this extensive data—combined with advanced analytics, cumulative trending, and comprehensive reporting—empowers landfill facilities to maintain compliance while optimizing budgets.

Headquartered in St. Paul, Minnesota, ddms is recognized as a leader in providing world-class environmental data services and systems. "Accurate and timely data are vital for landfill operators and owners," according to Mark Packard, CEO of ddms. "We're thrilled to pair Sanborn Head's deep expertise in landfill operations with our advanced data management capabilities. Together, we will equip Sanborn Head's clients with the high-quality data, actionable insights, and innovative tools necessary to optimize landfill management and drive operational success."

"This partnership strengthens Sanborn Head's position as a forward-thinking engineering consulting firm in the solid waste market," shared Sanborn Head Senior Vice President [Brian Beaudoin, PE](#). "We are looking forward to offering this value-added platform to our clients as it will reduce costs and save time."

We invite you to learn more about [Project Portal®](#) and its capabilities by contacting us at projectportal@sanbornhead.com.
