

## Fast-track Assessment of Vapor Intrusion Risk at Brownfield Properties

BY: DAVE SHEA, PE ON MAY 12, 2026

Real-time site investigations are increasingly being adopted for fast-tracking contaminated site characterizations. Sanborn Head's Dave Shea recently posted an article for the Brownfields Coalition of the Northeast (BCONE) on the benefits and challenges of real-time investigations for vapor intrusion assessments.

Read the article on the BCONE website here: [Brownfield Coalition of the Northeast – Fast-Track Assessment of Vapor Intrusion Risk at Brownfields Properties.](#)
