

Shea Presents at NSCW

JUNE 4, 2019

The challenges of revitalizing brownfield sites are many and vapor intrusion has changed the landscape for this type of redevelopment.

As a leading industry expert, Dave Shea, P.E. will present on the subject of vapor intrusion at the Northeast Sustainable Communities Workshop (NSCW) on June 4 in Newark, NJ. Dave will join other industry representatives to discuss innovative technologies and best practices to minimize health risks and contaminant liabilities. To learn more about these technical applications, or to register for the workshop visit the [NSCW website](#).
